

Autoliv joins research program on human user's interaction with autonomous driving

(Stockholm, Sweden, November 11, 2016) – – – Autoliv, Inc. (NYSE: ALV and SSE: ALIVsdb), the worldwide leader in automotive safety systems, joins international research program about human user's interaction with autonomous vehicles. The program, called ADAS&ME, involves 30 partners from 11 different countries and is led by Sweden's National Road and Transport Research Institute (VTI).

Human errors are claimed to cause up to 95% of all fatal crashes. The introduction of Advanced Driver Assistance Systems (ADAS) is expected to increase road safety by informing or warning the driver, and intervene when needed. In the future, ADAS will not only take the traffic and weather conditions into account, but also various states of the driver, such as fatigue, stress and inattention.

"To increase road safety and save even more lives, we need to understand how the driver interacts with highly automated driving solutions. This project is also about learning how driver collaboration with the technology can be facilitated," says Camilla Apoy, Research Project Leader at Autoliv.

Autoliv, with more than 60 years of development of safety technologies to the world's car makers, is leading the work on HMI Actions and Transitions, aiming to develop and define driver/vehicle interaction strategies. Autoliv's researchers are also heavily involved in developing the framework for driver state monitoring.

Autoliv at CES

Take the opportunity to learn more about Autoliv's automotive safety solutions at CES, the Consumer Electronics Show, in Las Vegas on January 4-8, 2017.

Safe Harbor Statement

This report contains statements that are not historical facts but rather forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include those that address activities, events or developments that Autoliv, Inc. or its management believes or anticipates may occur in the future. All forward-looking statements are based upon our current expectations, various assumptions and data available from third parties. Our expectations and assumptions are expressed in good faith and we believe there is a reasonable basis for them. However, there can be no assurance that such forward-looking statements will materialize or prove to be correct as forward-looking statements are inherently subject to known and unknown risks, uncertainties and other factors which may cause actual future results, performance or achievements to differ materially from the future results, performance or achievements expressed in or implied by such forward-looking statements. Numerous risks, uncertainties and other factors may cause actual results to differ materially from those set out in the forward-looking statements, including, without limitation, the uncertainty as to whether a binding or definitive agreement will be reached

between the parties regarding the proposed joint venture; the impact of any changes to the terms of the proposed joint venture agreed to during the negotiation of a definitive agreement; the uncertainty as to whether any binding or definitive agreement regarding the proposed joint venture will ultimately be consummated; the impact of any regulatory reviews of the proposed joint venture; uncertainties as to the future operating, financial and other developments with respect to the joint venture; our ability to manage and obtain the benefits of the activities of the proposed joint venture; and the impact of any changes in general economic and market conditions. For any forward-looking statements contained in this or any other document, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we assume no obligation to update publicly or revise any forward-looking statements in light of new information or future events, except as required by law.
